Summary	Experienced Software Engineer with 3.5 years of experience in backend development and frontend integration, REST APIs, and real-time systems. Skilled in building scalable ERP, CRM, and PMS platforms, integrating third-party services (payment gateways, social logins, APIs). Strong problem-solver focused on delivering reliable, user-centric mobile and web applications.

Experience

IBEX GLOBAL   Jun 2024 - Present
Software Engineer

- Developed and enhanced Quartz, a time-keeping solution used across six regions by global clients, including major companies like Amazon, Walmart, and others.
- Onboarded new regions, developed new features to meet evolving requirements and ensure seamless payroll generation.
- Ensured product stability and performance through continuous maintenance and optimization. Identified and resolved technical challenges and user-reported issues, ensuring seamless product functionality.

IBEX GLOBAL   Jun 2022 - June 2024
Analyst Software Engineer

- Developed and maintained web systems for call center compliance and data security, ensuring adherence to global standards.
- Contributed to the enhancement of time-keeping and payroll automation systems, improving accuracy and efficiency.
- Conducted training sessions for agents and supervisors on system usage and best practices.
- Utilized Git version control for collaborative development, managing repositories, branches, and merges effectively.

IBEX GLOBAL   Feb 2022 - May 2022
Software Engineer Intern

- Assisted in database migration from MySQL to MongoDB, optimizing data accessibility and performance.
- Worked with PHP to support ongoing backend development.

Education

Punjab University College of Information Technology (PUCIT)   Oct 2018 - Jun 2022
Software Development

Unique College   Mar 2016 - May 2018
Faculty of Science

The Govt Science School   Mar 2014 - Feb 2016
Matriculation Science

Projects

IBEX Projects   Jun 2022 - Present

• Implemented a full-stack time-keeping web application for agents and supervisors by using React, PHP, MySQL
• Developed scalable web applications using .NET for backend APIs and React for dynamic, responsive frontends. Integrated RESTful services, enhanced user experience, and ensured high performance for enterprise-level systems.
• Developed a scalable solution for time tracking and payroll, used across six global regions by clients such as Amazon and Walmart. Integrated with Workday for automated data processing and payroll generation

Other Projects   Dec 2020 - Jun 2022

• Build & deploy a social network app using React, Typescript, MongoDB, Redis, Queues, AWS, Terraform, CircleCI & more
• Designed and Enhanced responsive web pages using HTML, CSS, Bootstrap, and React for various coursework projects, ensuring cross-browser compatibility and optimal performance
• Developed a Campus Management System, creating reusable React components and implementing efficient CSS styling to enhance the front-end user experience
• Engineered an innovative e-learning platform with React and Core PHP, integrating a robust OTP-based authorization system that enhanced security for over 500 active users engaging in interactive learning experiences

Skills

Backend

PHP - Laravel - Yii - Dot-Net core

Frontend

JavaScript - React JS - Type Script

Web Technologies

HTML - CSS - jQuery - Bootstrap
